

## Use of Social Determinants of Health Codes for Member Outcomes

As part of AHCCCS' efforts in developing a streamlined method of collecting and tracking member outcomes, the use of specific ICD-10 diagnosis codes representing Social Determinants of Health has been identified as a valuable source of information that impacts member health.

The Social Determinants of Health codes identify the conditions in which people are born, grow, live, work, and age. They include factors like:

- Education
- Employment
- Physical environment
- Socioeconomic status
- Social support networks

As appropriate within their scope of practice, providers should be routinely screening for, and documenting, the presence of social determinants. Any identified social determinant diagnosis codes should be provided on all claims for AHCCCS members in order to comply with state and federal coding requirements. Beginning with dates of service on and after April 1, 2018, AHCCCS will begin to monitor claims for the presence of these codes.

As of October 1, 2017, the following ICD-10 diagnosis codes are defined as Social Determinants of Health codes under ICD10. Please note that Social Determinants of Health codes may be added or updated on a quarterly basis. Providers should remain current in their thorough utilization of these codes.
